## PARTS:

- [Samsung Galaxy Tab 3 8" Front Camera](#) (1)

## Step 1 — Battery - Open up the tablet

- Start out by separating the screen from the back cover using the larger plastic opening tool to pry them apart.

## Step 2 — Remove Back Cover

- Once every part of the screen is separated from the back cover, you should be able to fully remove it with your hands.

### Step 3 — Disconnect Battery

- To remove the battery you must use something small, such as tweezers, to disconnect the battery from its port.

 Note: the connection lifts up to remove

### Step 4 — Remove Battery

- After the battery is disconnected you may use your hands to pull out the battery. It may be a little difficult because there is adhesive on the backside of the battery.

## Step 5 — Remove the Front Camera

- Take the plastic remover tool and gently lift the component free from the motherboard.

To reassemble your device, follow these instructions in reverse order.
